

## PROJECT SUMMARY

# PS Plus 3 – HMP Wayland

Marek Musiol, Adam Bennett & Lucy Pendlebury

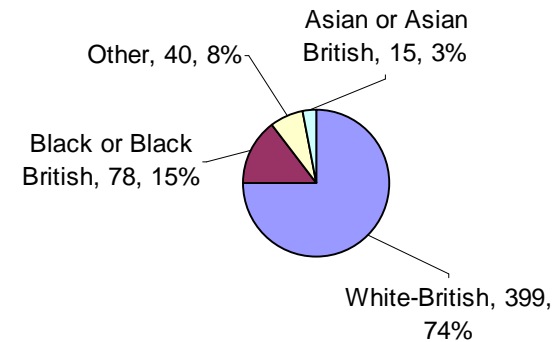

This report has been compiled to give information about the offenders (beneficiaries) worked with on the PS Plus 3 project in HMP Wayland - a male closed category C prison in the East of England. The project ran for 14 months between 1<sup>st</sup> April 2007 and 30<sup>th</sup> June 2008, in which time 532 beneficiaries were started on the project. At its peak, it is estimated that the project worked with approximately 30% of the prison population.

Of the 532 beneficiaries started, 19% (100) left the project early with 95% of these transferring to a non-PS Plus prison establishment.

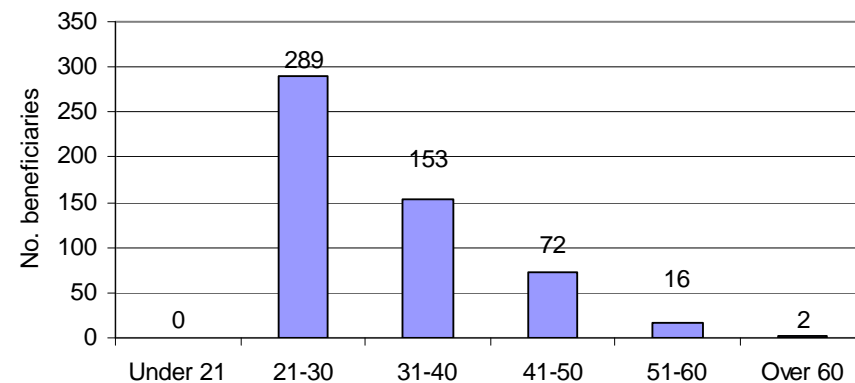

### Demographics

- 75% (339) of the beneficiaries started in Wayland were White-British. 25% (133) of the beneficiaries were from ethnic minority groups, and 19 beneficiaries were from outside the United Kingdom (where known).
- 54% (289) of beneficiaries started in Wayland were aged between 21 and 30, with the average age on starting the project being 31 years 10 months.
- The most common offence type of beneficiaries started in Wayland was theft, burglary or robbery (35%) followed by violent offences (26%).

### Ethnic Origin

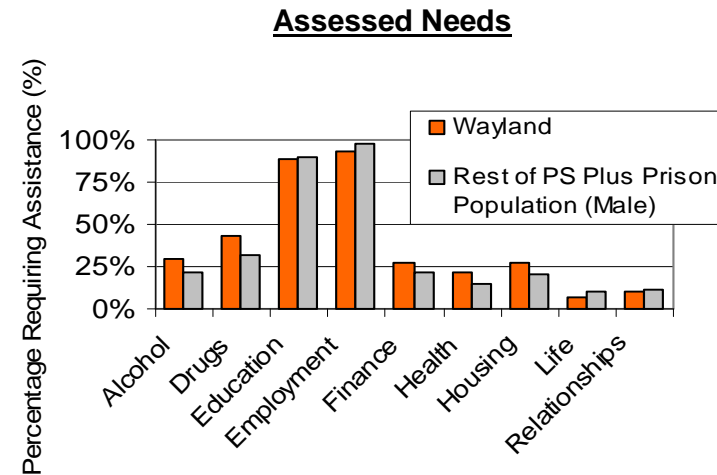

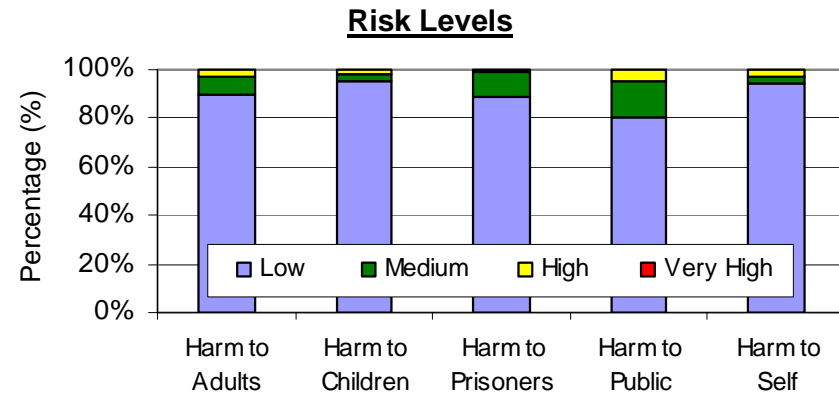

### Age Groups

### Assessment

- For the majority of prisoners (where known), the level of risk posed towards adults, children, other prisoners, the public and themselves is low. Less than 6% were classed as high or very high risk in each category.
- Every beneficiary required help with either employment or education. 496 (93%) beneficiaries required help with employment, while 441 (83%) required help with both employment *and* education.
- 313 beneficiaries were identified as requiring assistance with substance abuse, with 30% and 43% of beneficiaries requiring help with alcohol and drugs issues respectively.
- Comparison to the rest of the beneficiaries worked with in male PS Plus prisons shows that beneficiaries started at Wayland were significantly *more* likely to require assistance with alcohol, drugs, finance, health and housing issues. Analysis shows that beneficiaries started at Wayland were significantly *less* likely to require assistance with employment and life issues.
- Comparison to beneficiaries worked with in other male PS Plus prisons shows that beneficiaries in Wayland were just as motivated on starting the project.

**Soft Outcomes**

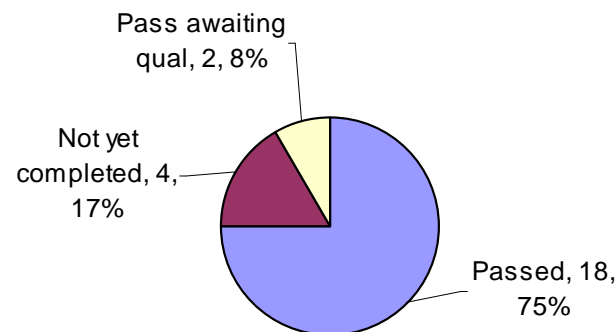

- 657 soft outcomes were achieved by Wayland.
- 64% (350) of the beneficiaries worked with at Wayland achieved at least one outcome while there.
- 298 beneficiaries received advice and guidance.
- 344 beneficiaries received assistance with employment issues.
- 256 beneficiaries received assistance with education or training issues.

**Qualifications**

- 20 courses or qualifications were passed by beneficiaries on the PS Plus project at Wayland.
- PS Plus beneficiaries completed courses in a wide range of subjects, from bricklaying to arts and crafts.
- 4 adult literacy and adult numeracy courses, and 2 plumbing courses were passed.
